Profile

Tech Lead with a software career dating to 2017. I combine technical leadership with hands-on C# and .NET development, software design, integration and the evolution of enterprise platforms. Earlier experience in accounting and operational finance informs my approach to controls, data quality and the consequences of change.

Areas of contribution

Software design · Technical leadership · C# and .NET · Integrations · Multi-tenant SaaS · System evolution · Technical coordination

Professional experience

Tech Lead — SIIGO

August 2024 – present

Technical leadership in the Memory Gestión ecosystem. Software design, technical coordination and evolution of enterprise systems. Collaboration with development, product, quality, security and infrastructure.
